Portable clip-on digital immersion circulator

MODEL FL4CA

Versatility ~

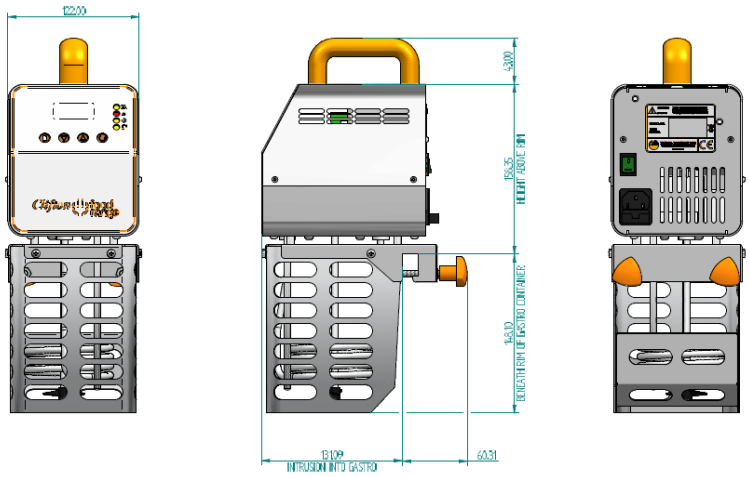
The latest addition to the popular Clifton Food Range is a space saving clamp-on immersion circulator. The design has been finalised with the input from several professional chefs. For Chefs who travel and want portability or have limited space in the kitchen this high-quality immersion circulator can be fitted in seconds to a standard gastro-tank or round straight sided vessel up to 50 litres (diameter 40cm). It is also an ideal unit for Chefs who only wish to cook sous vide occasionally. When not in use it can be easily stored away taking up little space.

Precise temperatures~

Using the same high precision controller found on all other Clifton Food Range products, accuracy and repeatability are guaranteed. Actual temperature is clearly displayed to 0.1°C. If required, the integrated timer can be set between 1 minute and 99 hours. There is audio/visual notification at the end of the set period after which the bath continues to operate at the set temperature.

High quality build and features~

Temperatures can be easily and rapidly set with the push button located on the wipe clean control panel. The entire case is constructed from high quality stainless steel. The heater and stirrer mechanism are surrounded by a stainless-steel cage which prevents pouches coming into contact with them. If the water drops below the recommended minimum level or the unit is inadvertently switched on without being immersed in water, ***'FILL'*** appears on the display as a visual alert and both heater and stirrer are immobilised. The clever clamping method eliminates the risk of the unit being inadvertently dropped into water. The circulator can be easily carried around using the sturdy trade mark **'orange handle'.**



Specifications~

Display/resolution:	Digital LED/ 0.1°C/1 min
Temp. range:	Ambient + 5°C ~ 95°C
Temp. setting:	Pushbutton
Stability/uniformity:	± 0.1°C
Timer Duration:	1 minute – 99 hours
Cycle end:	Audio/visual alert
Electrical supply:	230v
Power consumption:	1.25kW
Safety:	Visual 'FILL' message, heater, and stirrer cut-off
Weight:	3.7Kg
